MEMBERSHIP TIPS

Free tier: helpful or harmful?

The answer isn't obvious.

When a free tier helps

- You're building an audience from scratch
- Your paid tier needs social proof first
- Free members become your best marketers
- The upgrade path is clear and natural

When a free tier hurts

- You attract people who'll never pay
- Free members expect paid-level support
- It devalues what you're actually selling
- You spend energy on the wrong people

The question to ask:

> **What's the job of your free tier?**

If you can't answer that clearly, you probably shouldn't have one.

An alternative worth considering:

Instead of free membership, try **free content.**

Blog posts. Videos. A newsletter.

Let people experience your thinking without becoming members. Save membership for people ready to commit.

Paid Memberships Pro

Free isn't a strategy. It's a tool.

Use it with intention or don't use it at all.
