

CASE STUDY

**The basics are
handled. Now
they're free to grow.**

A 140-year-old beekeepers' association
moved 550+ members onto PMPro and
built room to add more.

SWIPE →

THE SITUATION

All of it, by hand.

The Cambridgeshire Beekeepers' Association tracked registrations, renewals, and expiration dates **in spreadsheets**, across 550+ members and several membership levels.

THE MOVE

One source of truth.

Martin set up PMPro on WordPress with fixed annual expirations for core members and **rolling one-year terms** for Associates, all in the same system.

THE RESULT

Zero errors. Fewer fakes.

Renewals run with no mistakes, reminders go out automatically, and the switch **reduced bogus members significantly**.

WHAT'S NEXT

Room to build more.

With admin off their plate, the committee is planning a **self-managed equipment loan library** open to members with a valid membership.

IN THEIR WORDS

“It does the core membership management for you, but you have to be prepared to customise towards your given use case.”

Martin Kendall, CBKA Membership Secretary
