OWNERSHIP

Building ON a platform vs. building IN a platform

The difference changes everything.

Paid Memberships Pro

Building IN a platform:

- Your content lives inside their system
- Your members are in their database
- Your customization options are their features
- Leaving means starting over

Paid Memberships Pro

Building ON a platform:

- Your content is yours, stored where you control
- Your member data is portable
- You choose what tools connect and how
- Leaving is a migration, not a loss

The question most people forget:

> "What happens if I outgrow this?"

Building IN

Makes that expensive.

Building ON

Makes it possible.

To be honest:

Building IN is often easier at first. Less decisions, faster start.

Building ON takes more upfront thinking. But it pays off when things change.

Both approaches work.

But only one gives you options later.

Know which one you're choosing.
