MEMBERSHIP TIPS

# What to build first when starting a membership

In order. No skipping.

Paid Memberships Pro

1

# A clear promise

> One sentence that tells someone exactly what they'll get and why it's worth paying for monthly.

**If you can't write this, you're not ready to build anything else.**

2

# One core piece of value

> Not a library. Not a course. Not a community.

One thing that delivers on your promise. The rest can come later.

3

# A way to collect payment

> Simple checkout. Recurring billing. That's it.

You don't need a member directory or gamification or a mobile app. Not yet.

4

# A way to talk to your members

> Email works. A simple forum works. A private space works.

Pick one. Use it consistently.

# Everything else is a distraction.

Features feel productive. Clarity is productive.

Build the smallest thing that delivers real value. Then listen. Then improve.
